**NEWS RELEASE**

**Regency Silver Announces Private Placement of  
up to CAD\$2.0 Million at \$0.40 per Share**

**Vancouver, BC – March 24, 2023 – Regency Silver Corp.** (“Regency Silver” or the “Company”, TSXV- RSMX and OTCQB-RSMXF) is pleased to announce that it has arranged, subject to regulatory approval, a non-brokered private placement of up to 5 Million common shares at a price of CAD\$0.40 per share for gross proceeds of CAD\$2.0 Million. Closing of the private placement is anticipated to take place on or before Wednesday, March 29, 2023.

There will be finders fees payable in cash or securities, as permitted by the policies of the Exchange equal to 6% of the proceeds raised by the finder.

All common shares issued under the private placement will be subject to a four month hold period, in accordance with applicable Canadian securities laws.

The proceeds will be used for ongoing drilling on the flagship Dios Padre property of Regency Silver and for general working capital. The 2023 ongoing drill program is progressing well with 6 core drill holes completed since the middle of January. Regency is currently drilling the seventh hole.

The ongoing drill program is designed to follow up on discovery Hole REG 22-01 drilled in 2022. REG 22-01 yielded **35.8** metres of **6.84** g/t gold, **0.88%** copper and **21.82** g/t silver.

The follow up drill program began on January 15<sup>th</sup> 2023. The visual results of the first three holes totaling 1,974m of drilling were reported in our February 23, 2023 news release.

Holes 4, 5 and 6 of the drill program are designed to find continuity of the breccia 50m to the west of Hole REG 22-01.

Highlights of the program as reported in our February 23 news release include:

- REG-23-14 intersects **32m** of pyrite-specularite-chalcopyrite supported breccia from ~454-486m within a broader zone of disseminated and vein hosted mineralization ~25m down dip from REG-22-01.

- REG-23-15 intersects **120m** of specularite-pyrite-chalcopyrite supported breccia from ~400-520m (Figure 3a,b,c,d and e) within a broader zone of disseminated and vein hosted mineralization ~85m down-dip from REG-22-01 and ~62m down-dip from REG-23-14.

Assay results for the first 3 holes are expected by mid April.

The data collection portion of the Induced Polarization (IP) program on the Dios Padre property has been completed. The results of the IP program are also expected before mid April.
