NEWS RELEASE

Regency Silver Closes First Tranche (\$1,122,700) of Private Placement Upsizes Private Placement to \$1.75M Due to Strong Investor Interest

Vancouver, BC – September 27, 2023 – Regency Silver Corp. (“Regency Silver” or the “Company”, TSXV- RSMX and OTCQB-RSMXF) is pleased to announce that it has completed the first tranche of a previously announced non-brokered private placement. Also, due to strong demand, the private placement has been upsized to CAD\$1.75 Million from \$1.5 Million.

Regency Silver has issued 5,613,500 units at a price of \$0.20 per unit on this first tranche closing for gross proceeds of CAD\$1,122,700. Each Unit is comprised of one common share of the Company and one half of one transferable common share purchase warrant (the "**Warrants**"). Each whole Warrant is exercisable to purchase one common share of the Company at a price of CAD\$0.30 per share for a period of two years from the date of issuance. The second tranche is expected to close shortly.

In connection with this first tranche closing, the Company paid cash finder’s fees of \$21,312 and issued 106,650 broker warrants. Each broker warrant will entitle the holder to purchase one common share of the Company at a price of CAD\$0.30 per share for a period of two years from the date of issuance.

Bruce Bragagnolo, Regency Silver’s Executive Chairman stated, "We are pleased to complete the first tranche of this private placement and thank our existing shareholders and new shareholders for their strong support."

All securities issued under the private placement will be subject to a four month hold period expiring on January 26, 2024, in accordance with applicable Canadian securities laws.

The proceeds will be used for exploration and development of the Company’s properties and general working capital.

Regency Silver’s flagship project is the Dios Padre gold-copper-silver project in Sonora, Mexico. Regency Silver has made a new high grade discovery at Dios Padre and has drilled **35.8** metres of **6.84** g/t gold, **0.88%** copper and **21.82** g/t silver in Hole REG-22-01. Hole REG-23-14 intersects 35.9m of 5.51 g/t Au including **29.4m of 6.32 g/t** gold.

As announced in July of 2023, 8 of 9 holes drilled at the Dios Padre property intersect the targeted breccia zone down-dip and along strike to both the east and west from REG-22-01 with room for expansion in all directions. Breccia appears to widen with increased depth. The 10th hole, REG-23-22 targets a potential up-dip extension of the mineralized zones ~200m to the west of the discovery area coincident with the strongest chargeability anomaly detected in the 2023 IP survey. Significant concentrations of sulphide (dominantly Pyrite) are found coincident with this zone.

The assay results for 6 of the above holes into the breccia zone and 1 hole into the strong chargeability anomaly will be released shortly.
