

## Regency Silver Corp. Announces Availability of Investor Webinar Replay Reviewing 2025/2026 Drill Results at the Dios Padre Project

Vancouver, BC — July 2, 2026 — Regency Silver Corp. (TSXV: RSMX | OTCQB: RSMXF | FRANKFURT: ZJ90) (“Regency Silver” or the “Company”) announces that a recording of its live investor webinar held on June 25, 2026 is now available for viewing. The webinar can be viewed by clicking the Replay Link: [Watch the Replay](#) or on the Company’s website at [www.Regency-silver.com](http://www.Regency-silver.com). The webinar, hosted by Chief Executive Officer Bruce Bragagnolo and Head Geologist Michael Tucker, provided a comprehensive review of the complete results from the 2025/2026 drill campaign at the Company’s Dios Padre Project, located near Yecora, Sonora, Mexico, and included a live question and answer session with investors.

### WEBINAR REPLAY

- **Originally Aired:** Thursday, June 25, 2026
- **Presenters:** Bruce Bragagnolo, Chief Executive Officer, and Michael Tucker, Head Geologist
- **Replay Link:** [Watch the Replay](#)

The webinar reviewed complete results from nine drill holes totalling 6,234 metres drilled in the 2026 portion of the campaign, as first reported in the Company’s news release dated June 16, 2026. The replay includes a detailed geological walkthrough, core photography, and section views, followed by a live question and answer session addressing investor inquiries on the drill results, project geology, and corporate strategy.

### KEY HIGHLIGHTS COVERED

- **REG-26-35 (Most Significant Hole to Date):** 5.06 g/t Au, 41.85 g/t Ag and 1.10% Cu over 36.35m, within a broader 96.00m zone averaging 2.08 g/t Au
- **REG-26-29 (High-Grade Silver):** 266.04 g/t Ag and 0.56% Cu over 7.55m, approximately 250m below the historic Dios Padre Silver mine
- **System Scale:** The mineralized breccia body now extends approximately 775 metres down-plunge and remains open in all directions
- **Vertical Zoning:** Silver-copper-rich mineralization at shallower depths transitioning to gold-copper at depth, consistent with a robust magmatic-hydrothermal porphyry-epithermal system

### MANAGEMENT COMMENTARY

*“We were pleased with the level of engagement from our shareholders and the investment community during the webinar. The questions we received reflected genuine interest in the scale and quality of what we are building at Dios Padre. For those unable to join us live, I encourage you to watch the replay and reach out to our investor relations team with any follow-up questions.”*

— Bruce Bragagnolo, Chief Executive Officer and Director

## **ABOUT REGENCY SILVER CORP.**

Regency Silver Corp. (TSXV: RSMX | OTCQB: RSMXF | FRANKFURT: ZJ90) is a Canadian mineral exploration company focused on high-grade gold, silver, and copper in Mexico. The Company's flagship asset is the **Dios Padre Project in Yecora, Sonora, Mexico**, where Regency Silver has discovered a large, high-grade gold-silver-copper system interpreted as a magmatic-hydrothermal breccia that widens with depth.
